

ROAR in conjunction with 3 of our affiliate tracks is proud to announce our Clubman Series. This pilot program focuses on the local level of racing, It is designed to keep it simple, fair and fun. Here is a quick overview of how the program works.

- 1. Tracks pick a class such as 2wd 17.5 buggy and/or 2wd 17.5 stadium truck. Racers must use a ROAR approved non timing ESC in Blinky mode.**
- 2. The track then picks a handout 17.5 motor for the club series.**
- 3. Each time a racer attends one of the local races they will draw a number for their motor, at the end of the day they turn it back in.**
- 4. Points are assigned to the racer in the series.**
- 5. ROAR provides the track with awards.**
- 6. 100% of your entry stays at your track.**

For more details please contact the individual track. Must be a current ROAR member to participate in the series.
